

## CARRIER SECURITY AUDIT COMMITTEE

The ***Carrier Security Audit Committee*** is a newly formed group of Loss Prevention/Security executives representing diverse industries such as pharmaceutical, big box, specialty, grocery, shippers and others with a common interest in securing their Supply Chains by adding increased focus on the “final-mile” delivery.

Under the authority of the *International Supply Chain Protection Organization* (ISCPO), the committee’s objective is to achieve a unified voice in carrier security standards and create an industry carrier audit that can be incorporated into our own respective compliance programs.

The ISCPO’s carrier audit will differ from other industry recognized assessments already in circulation as it will focus on internal controls that directly impact day-to-day loss or performance issues experienced such as POD and scan integrity. In turn, the ISCPO is interested in endorsing those carriers who embrace and comply with the audit standards set forth.

If you are interested in representing your organization in this project, please contact our *Recruitment Officer* - Christopher Coffey, CFI [Christopher.Coffey@sephora.com](mailto:Christopher.Coffey@sephora.com) or *Committee Chairman* - Wes Bank, LPC [Wes.Bank@DHL.com](mailto:Wes.Bank@DHL.com)
